

The Geography of Glendalough: Rivers

Lugduff Brook

Start at the mouth of the Lugduff Brook and follow it back. There is a small area of lower course between the mouth and the main (3rd) bridge. Beyond this is the upper course with Poulanass Waterfall.

Features

List the features that you see in the upper & lower course, and state whether each feature was formed by erosion or deposition.

Lower Course

Feature	Erosion or Deposition

Upper Course

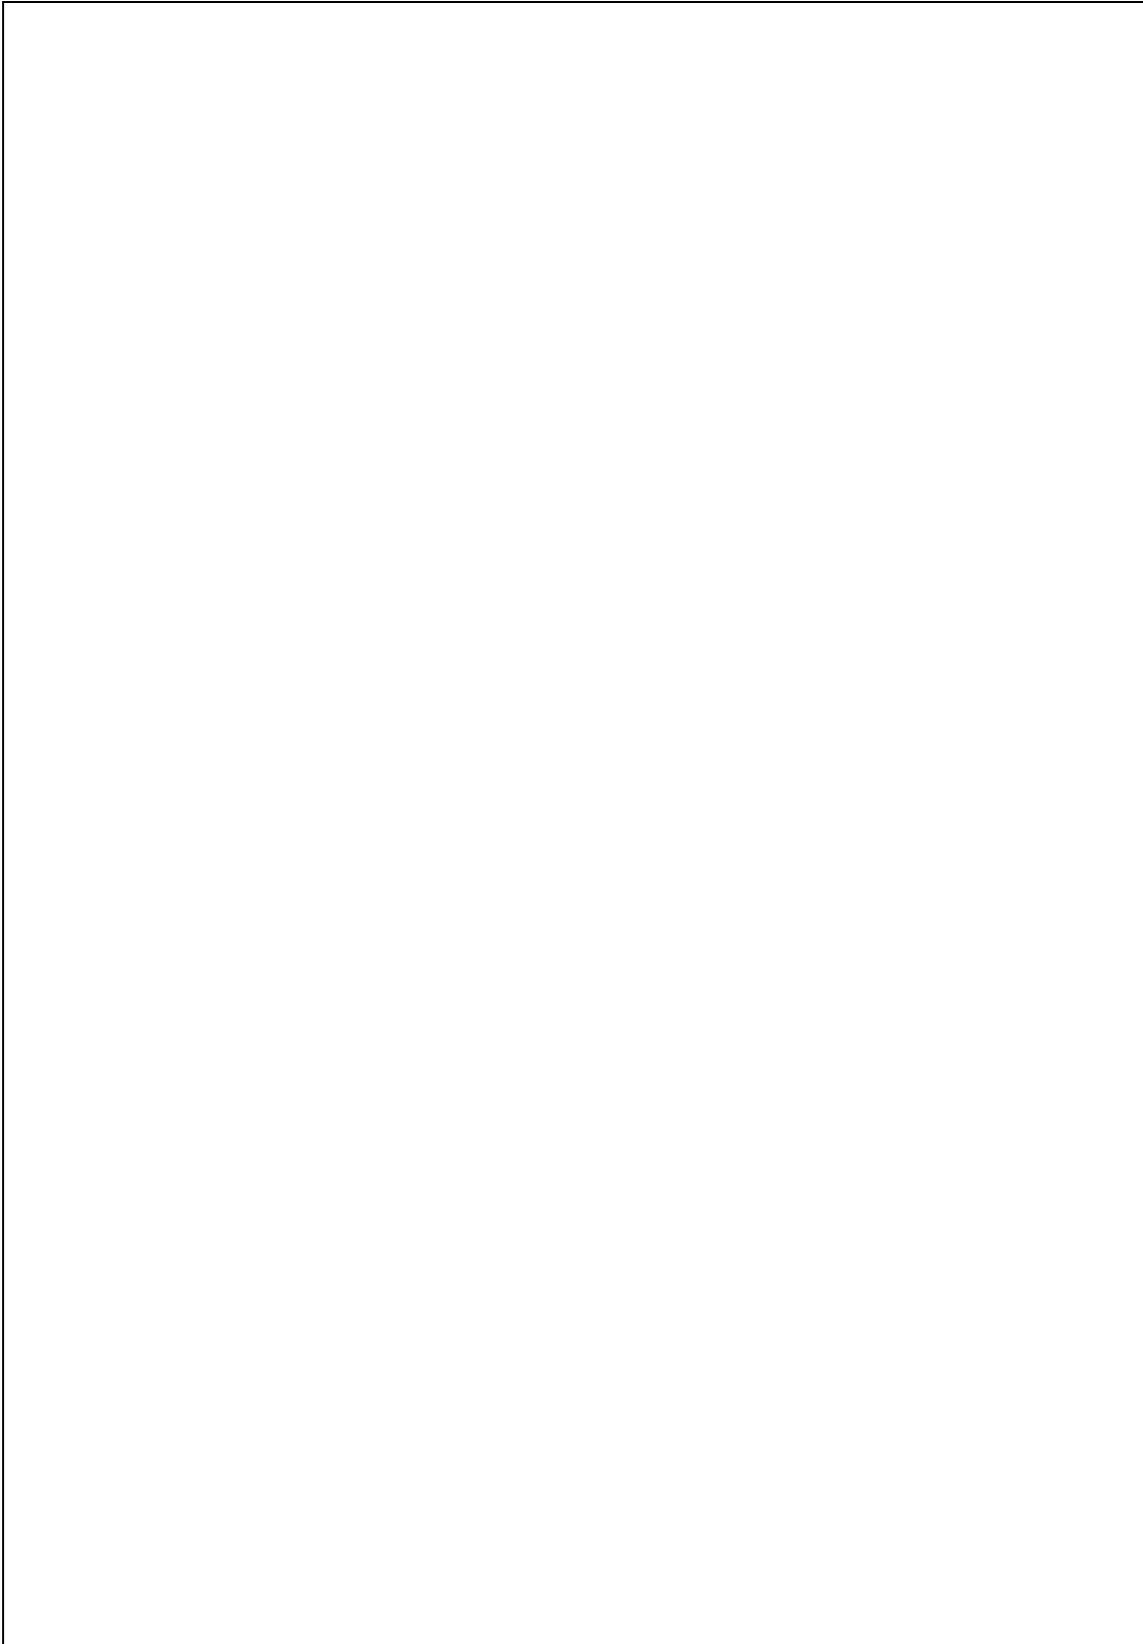

Feature	Erosion or Deposition

On which course is erosion most active? Why?

On which course is deposition most active? Why?

Field Sketch

Select one site (upper or lower course) and draw a field-sketch, labelling the features you have identified.

A large, empty rectangular box with a thin black border, intended for a student to draw a field sketch of a site in Wicklow Mountains National Park. The box is centered on the page and occupies most of the lower half of the worksheet.
